Assignment 2

1. The figures are identified as follows:
 - a. Oblique
 - b. Orthographic
 - c. Orthographic
2. The figures are identified as follows:
 - a. Section
 - b. Elevation
 - c. Plan
3. The two that are true length for the house are B, C. The reason for this being both are connected at the same axis and isometric drawings show actual length at that location
4. The book states that isometric pictorial drawings are the easiest to make on a job site.
5. Working drawings are usually orthographic projections. These are usually plan views.
